PROFESSIONAL EXPERIENCE

YouTube, San Bruno, CA, Mar 2022 – Present

Senior Software Engineer

- Trusted by VP/C-level leadership to bring Ask Search to life on YouTube on TV, pioneering a 0-to-1 generative AI search experience. Technical lead with end-to-end ownership across full-stack prototyping, design, and cross-functional alignment. Drove 6x growth in Ask Search adoption across YouTube.
- Define the technical roadmap for how YouTube on TV integrates with AI-powered search, shaping how viewers interact with these experiences on the big screen.
- Serve as the subject matter expert for voice experiences and led the redesign of voice serving around a Redux-powered architecture. Reduced soft mic latency by 60% and delivered core capabilities including audio saving, hold-to-talk, language selection, logging, and metrics.
- Drove inline previews across multiple content types, evolving how viewers discover and explore content on TV.
- Enabled the seamless transition to YouTube Endemic Shows, which launched in 2025.

Google, Sunnyvale, CA, Jun 2019 – Mar 2022

Software Engineer

- Lead team of 5+ engineers to oversee creation, suspension, and provision of company vendor contractors.
- Owned and managed COVID-19 suspension feature avoiding re-onboarding of 1000s of vendors and contractors.
- Leading implementation of secure partner collaboration services which reduce FTE time by 67%.
- Built out Comments API for a tool that manages over 40% of Google's annual revenue.
- Hosted Summer 2021 interns to help create tools and services for Identity and Access Management.

LinkedIn, Sunnyvale, Jun 2018 – Aug 2018

Software Engineer Intern

- Worked under the Flagship Growth team to deliver 4 key features as a part of the Novice Member Experience.
- Built and launched end-to-end search bar feature in LinkedIn's onboarding process, increasing engagement by 10%.
- Presented newly released feature and assessment on onboarding performance to team's Engineering Director.
